

Baxter Travel Club

Medical Certificate for the airline

Please contact your airline and hand this document in at least two weeks prior to date of travel!

Name of patient: _____

The above mentioned patient suffers from a chronic kidney failure requiring continuous daily treatment and has to travel with his HomeChoice Cycler.

The HomeChoice in his possession is crucial for his well-being and survival.

Baxter recommends that the HomeChoice device gets transported in the aircraft cabin as hand luggage. The size of the device is 72 cm x 45 cm and weighs 21kgs together with the case.

Under special conditions, it could also be put into luggage compartment:

- The device is temperature-sensitive. Temperature in the luggage compartment should be between -32°C and 45°C.
- The luggage compartment should be pressurized.
- The HomeChoice device should be labelled as fragile.

Dialysis Center: _____

Address: _____

Phone: _____
